

## Guest Speakers, February 15, 2017

### **Patrick Cullina**

Cullina is an award-winning horticulturist, landscape designer, photographer, lecturer, and organizational consultant with more than twenty years of experience in the landscape world. He runs an international design and consulting practice based in Manhattan that is dedicated to the innovative and sensitive integration of plants and materials into a diverse range of design projects. Previously, he was the founding VP of Horticulture & Park Operations for The High Line and VP of Horticulture, Operations and Science Research at Brooklyn Botanic Garden. His current work is comprised of a broad spectrum of services provided to a host of private, municipal, corporate and conservancy clients and to a number of leading landscape architecture and architecture firms.

### **Paul Tukey**

Internationally recognized as “the father of the organic lawn movement” and one of America’s foremost gardening communicators, Paul Tukey is author of the best-selling book, *The Organic Lawn Care Manual*. Having appeared regularly on Good Morning America, Martha Stewart Living and in thousands of publications including the *Washington Post*, *Readers Digest*, *Men’s Health* and *National Geographic*, Paul now serves as Chief Sustainability Officer at Glenstone, a modern art museum in Potomac, Maryland, that maintains its property with all-organic protocols.

### **Tony Cervený**

A career officer in the Air Force who served at the White House under presidents Clinton and Bush, Richmond native Tony Cervený was recruited a decade ago to help a Maryland benefactor fulfill his vision of launching an art museum from the ground up. Currently overseeing a significant grounds and facilities expansion that will grow Glenstone to nearly 250 acres, Tony evaluates all cutting-edge environmental protocols prior to their implementation.

### **Jennifer Low**

Jennifer is a licensed Landscape Architect with over eleven years of professional experience in Southern California, San Francisco, New York City, and most recently, in her hometown of Seattle, Washington. As a designer and project manager, she has worked on a wide range of public and private sector project types and scales in collaboration with a diverse spectrum of client and stakeholder groups and leaders in the design, architecture, and engineering industries. Some of her past project work includes parks, campus master plans, urban streetscape and plaza design, playground design, environmental restoration, and modern landscape preservation work. Jennifer’s primary passion and drive as a landscape architect is to improve environmental health and social equity through landscape design, valuing community engagement in the design process, and the transformative power that landscape can have on improving both mental and physical well-being.
