

Blossom shower

A fun sensory activity for babies and toddlers.

Blossom shower

In spring, some trees grow blossom. The soft, scented flowers are brilliant for stimulating your child's senses.

Just sit your little one under a tree covered in blossom. Then watch their delight as the branches move in the breeze and petals come floating down around them!

Encourage your tiny explorer to feel the silky petals, breathe in the sweet smell, and watch for buzzing bees collecting nectar and pollen.

Look out for blossom growing on trees and hedges in spring.

Feel free to copy and share this for personal and educational use – and don't forget there are loads more brilliant activities to download on our website!
