

Supply List: Introduction to Drawing Pens

Drawing Board and Lights:

Bring the drawing board and lights you used for Intro and Intermediate Drawing for Botanical Illustration. No need to purchase anything new.

Mechanical Pencil Size 0.2mm and 2B Refill Leads

Pentel Orenz Mechanical Pencil 0.2 is a good one if you do not have a 0.2 mechanical pencil. If you already have a 0.2mm mechanical pencil, bring it, use it. No need to purchase anything new.

NOTE: MUST be a 0.2 mechanical pencil, nothing larger please. This will be your training guide to creating long delicate lines and adjusting your hand pressure. Long thin lines spaced evenly apart and created in one flowing movement are needed. Once you're able to create these lines with the 0.2mm mechanical pencil without breaking you're ready to create beautiful ink drawings! So start practicing your line work now.

Paper

Dura-Lar Matte 9x12 (or if you prefer more space to arrange compositions purchase 11x14 pad. Choose one size to work from. Purchasing Both are not necessary)

DRAWING PENS

Note: Due to the fineness of its tip, this pen must be used with a light touch. Applying too much pressure may bend and damage the tip.

Faber-Castell Pitt Artist Pens - Set of 8 Black Wallet Set, Various Nibs (set looks like the image above, can also be purchased locally at Plaza Art. Search Amazon for current deals, sometimes it's less expensive.)

Copic Multiliner SP Pen - 0.25 mm

Copic Multiliner Tip replacements 0.25 AND Ink Replacement

Note: You will be able to test additional fineliners, brush pens and more during class. These supplies are provided with tuition. Also, should you choose to use these pens before class please know that the tips are extremely fragile (especially the Copic), handle these pens with a light touch. It is best used with a synthetic paper made from polypropylene resin or polyester. Applying anything but a light touch may bend and damage the tip.

Additional Supplies Needed

Da Vinci Nova Brush - Bright, Short Handle, Size 1 You will use this to clean work and so a small, short haired Bright shaped brush works perfectly. If you already own a brush like (regardless of what brand) bring it. There's no need to purchase an additional one. If you've taken the Color Mixing class with me and purchased the Da Vinci Nova Brush - Bright, Short Handle, Size 4 you can use this should you not want to purchase additional brushes. I find the smaller Size 1 allows me to Maneuver better. With a little bit more finesse and depending on the area being cleaned the Size 4 can work.

Ruler: to measure and create straight lines

Pen and writing paper: for taking notes

Removable Tape: Any removable tape will do. It must be removable though in order to have a low tac and not damage paper. **3M Scotch #811 Magic Plus Removable Transparent Tape** is a good one should you not have any on hand

70%-90% Isopropyl Alcohol: I suggest transferring some into a travel size 2 oz bottle and bringing it with you to class rather than the whole bottle. Please do not bring the whole bottle with you. I found this 2 oz glass container on Dick Blick and it may work well. Glass jar and lid are purchased separately \$2.65
